

LENGTH OF WIRE AND CABLE MEASURING DEVICE

Length of wire and cable measuring device:

- measuring range 0.01 m–9,999.9 m
- thickness of cables 3 mm–50 mm
- accuracy $\pm 0.5\%$ (for length of cable 5 m and more)
- counter reading 1 cm

Universal table for measuring:

- suitable for use in shops
- user friendly

ADVANTAGES:

- measuring the lengths of different materials
- stainless steel housing
- user friendly and customisable
- possibility of installation in production line

LEGAL USE:

The measuring device is in accordance with European Directive MID (EC certificate No. SI 15-01-003 MID).

It can be used as a legal measuring device in the European Union.

Possibility of accredited calibration.

* XX – year of approval.
