

Special accessories edding compact printer

Rotary encoder set Pro

518 €

- For optimal print results on alternating conveyor speeds
- Detects the current speed in realtime
- Allows for seamless printing, also at standstill and restart of the belt
- Incl. spring arm for mounting
- High-quality premium product, Made in Germany
- Available with the following pulse configurations: 600, 800, 1.200, 2.500, 5.000

Sensors

from 249 €

- Sensors ensure precise placement of the pressure
- Different applications require different types of sensors
- Available sensors: Inductive proximity sensor, Contrast sensor, Fork light sensor, Proximity sensor
- Mounting material included

Alarm light LED set [490072000]

335 €

- Optical signalling of operating status in 3 colours: Red (error), Yellow (warning), Green (printing OK)
- Modern LED technology
- Incl. mounting bracket
- High-quality WERMA product

WiFi module standard [490163000]

29 €

- Allows for WiFi integration
- For 2.4 GHz networks
- Ideal for mobile use of the printer
- Compact design
- No need to install driver
- Wifi Stick with rotatable, powerful antenna available (490162000) 29€

UV lamp set [490168000]

1.940 €

- For use with UV drying ink 490083000
- Immediate drying under the lamp
- Particularly high print durability, resistant to solvents and cleaning agents
- Horizontal and vertical installation possible

Scan and print package - PC [490366000]

490 €

- For scanning and printing of barcodes, QR codes etc.
- Includes Scanner and Software
- No manual text entry, no input errors
- Storage of multiple data possible
- Also available on dedicated hardware for users without PC (490366000)

**Conversion kit set
[490406000]**

390 €

- For printing on round material such as barrels, pipes, etc.
- Complement for Potable 12 and 25
- Application recommended from a minimum diameter of the object of 19 cm

**Guiding line
[490109000]**

790 €

- For mounting an edding in-lines on new or existing production lines
- Horizontal and vertical mechanical adjustment of the printer via rotary wheel
- Available in 2 variants:
 - 490109000 vertical adjustment
 - 490160000 horizontal adjustment (only in combination with vertical unit)

**Guiding plate
[490371000]**

80 €

- For precise imprinting in small fields
- Printer is unrolled onto stencil and guided along the lower edge
- Material thickness 1.0 mm
- Other special sizes on request

**Conveyor belt set 1.000 x 100
[490099000]**

1.920 €

- For the use with the edding in-line printing system
- Semi-automated solution to code a large number of products
- Powerfull direct drive motor
- Maximum load: 75 kg
- Speed 18 m / min
- Belt width: 100 mm
- Belt length: 1000 mm
- Custom configurations available upon request

**Desk sled construction set
[490086000]**

1.240 €

- For manual coding
- Precise positioning and triggering of the print
- Size individually adaptable, including cutouts for a safe placement of products
- Top plate made of technical plastic
- Sliding top 300 x 150 x 12 mm
- Base plate 450 x 220 x 20 mm
- Incl. rotary encoder, mounting bracket and sensor for triggering the print

**Mounting bridge
[490161000]**

490 €

- For mounting an edding compact printer above a conveyor belt
- For 1x edding in-line or up to 4x in-line Pro (head)
- Individual adaptations to conveyor belt width and product height on request

We are happy to advise you!
